

Residential Water Chemistry Information

(Post Water Treatment Plant)

| | <u>2018 Levels</u> |
|--|------------------------------|
| Alkalinity* (Total Alkalinity as CaCO3) *Alkalinity may be stated as CaCO3, CO3, or "carbonate" content | 255 mg/L |
| Calcium | 87.5 mg/L |
| Chloride ** SMCL 250 mg/L | 80.1 mg/L |
| Iron ** SMCL 0.3 mg/L | .015 mg/L |
| Manganese ** SMCL 0.05 mg/L | 0.002 mg/L |
| Magnesium | 39.6 mg/L |
| рН | 7.1 |
| Sodium | 26.4 mg/L |
| Sulfate | 83.8 mg/L |
| Total Hardness | 22.2 gpg (Grains per Gallon) |

^{** &}lt;u>SMCL (Secondary Maximum Contaminant Level)</u>: Per the EPA, this is a set of 15 non-mandatory water quality standards that has been established to assist public water systems manage the aesthetics of their drinking water supply (such as color, taste, or odor.) These contaminants are not considered to present a risk to human health at the SMCL.
