Weekdays

7:00 a.m. to 3:30 p.m.

763-585-7100

Weekdays after 3:30 p.m.

and on weekends, call 911 and the dispatcher will contact the appropriate on-call service staff.

Project Update

The City of Minneapolis and City of Brooklyn Center plan to resurface 1.2 miles of 53rd Avenue N from Penn Avenue N to Lyndale Avenue N. Please see the map on the reverse side.

Project Area

This newsletter is to provide you with notice that construction work on the project will begin the week of June 6, 2022. It is estimated that the work will take approximately 3-4 weeks to complete with the anticipated completion date for the overall project by early July.

Scope of Work Outlined

The resurfacing project will include a new pavement surface, pavement striping, and the installation of a new bikeway on this segment of 53rd Avenue N. The general sequence of construction will be as follows:

- Milling off 2" of existing roadway surface
- Bituminous pavement repairs as necessary
- Installation on the new bituminous pavement surface
- Installation of pavement markings and signs

Streets will remain open with flagging operations during construction. Road conditions may change on a daily basis. Please drive with caution in the work zone. We realize that construction activity can cause inconveniences for many people, and we appreciate your resiliency and patience while the project is being completed.

If you have special needs regarding access to or from your property, please call the Brooklyn Center Engineering Division immediately at 763-569-3340 and we will be happy to work with you. We are able to work out special arrangements for particular needs, but we need to know ahead of time so we can best meet your needs.

We look forward to working with the contractor and you to complete the improvements as smoothly as possible.

53rd Avenue Mill and Overlay

CONSTRUCTION TIPS

- The Contractor is authorized to work from 7 am to 7 pm, Monday—Friday. Extended hours beyond 7 pm and work on Saturdays may occur when necessitated and approved by the City.
- Keep children away from construction. Construction activity and machinery can be fascinating. Your assistance in directing your children away from construction areas is appreciated.
- Please stay clear of machinery and construction trenches. Construction vehicles can move quickly and suddenly. Always be prepared for unexpected hazards.
- Avoid using a cellular phone when walking near a construction zone. Staying alert to your surroundings reduces accidents.
- Please continue to place your garbage and recycling curbside. City staff and the Contractor will coordinate with the haulers to ensure these services continue throughout the project.

Important!!

Please contact 911 during evenings and weekends if you have a construction related emergency such as ruptured water service, sewer backup, significant flooding or anything requiring immediate attention. The 911 dispatcher will contact the appropriate on call Public Works personnel.
