Subject: 2023 Street Improvement Projects

Dear Resident:

The City of Brooklyn Center's Capital Improvement Plan identifies a potential street improvement project in your neighborhood. A map of the proposed project area is pictured on the back of this letter. This project is tentatively scheduled for next year, 2023. A feasibility study will be undertaken to evaluate the need for the project and estimated cost of the streets and utilities improvements.

A survey crew with Bolton & Menk, Inc. will be in your neighborhood over the next several months collecting data for the feasibility study. The data will include road elevations, utility locations and property boundaries. The survey crew will also collect information on driveway grades and surrounding topography adjacent to the right-of-way to assist in the project analysis.

A geotechnical crew with Braun Intertec Corporation will also be in your neighborhood performing soil borings in the roadway.

If you have any questions about the data collection or the feasibility study, please contact the Engineering Division at 763-569-3340 or publicworks@ci.brooklyn-center.mn.us.

Sincerely,

Public Works Department - Engineering
City of Brooklyn Center
